On the coast, from New Jersey to Maryland, and in North Carolina, Ten-nessee, Keatucky, Arkan-as and Mis-souri, as also in northern New England and Florida, there is improvement in corn since Aug. 1.
In Michigan, Wisconsin, and Indiana,

and in Georgia, Alabama, Lonisiana and Texas, the condition is unchanged. A decline has occurred in New York, Ohio, Illinois, and in all the northwestern states and some others of less importance. The crop is late in the eastern states, requiring matering weather through September. It is also late and variable in development in New York and Propositionic and Pennsylvania.

The Atlantic coast states return relative high conditions impaired locally by the effects of mid-number drouths and latter storms. In Tennessee and Mississippi, Arkansas and Texas the drouth was more or less severe from the 20th of June. The record shows the crop was maturing and ripe before rains came. The Ohio valley and the Missouri valley report protracted drouth and low

condition.

While the rains of the last two weeks of August have been beneficial nearly of August have been beneficial nearly everywhere they have not always restored the losses of the first half of the month. In the bottom lands where growth was maintained, the recent rainfall will make a good crop, while the drier upland were beyond recovery. The lowest condition is in Kansas, though some of the eastern counties make good return. The Dakotas and Nebraska are little higher. The crop is late and will require as much time to mature in the latitude of 40 degrees as for the earlier varieties grown on the for the earlier varieties grown on the line of 42 degrees.

Rye yields less than was expected, as the condition as reported is reduced to \$5.4.

The September condition of oats is the lowest ever reported, having fallen from 70.1 in August to 61.1. The rate of yield will be the smallest in twenty

The condition of barley is not very seriously lowered, from \$2.8 to 78.6.

Buckwheat has fully maintained its August condition, the average being

90.5 against 90.1. The figures for potatoes have failen since Aug. 1, from 22.3 to 65.7, the lowest average ever reported, that of 1867, being 77.

AN OLD TIME LEGICY. Georgians Trying to Find Out What to Do With It.

ATTANIA Ga., Sept. 11 The state school commissioner and the attorney general were in consultation an sday in regard to securing for the purpose of negro education in this state a stat of money that has lain in the Bank 1 In-

money that has lain in the Bank | Lingland for many years | It is a loney, the history of which is very ingular.

Archiband McLean, a Sc. teleman, was a presperous planter in Cherles of early in the present century. His we cowe was knewn as the wife, and on it be bad a large number of slaves. His tanal, in Scotland was strongly oppised to slavery. After his death and the death of his son and heir a certain interest in the estate went to his brother, John Melean, John McLean died at Glasgow July 9, 1836, leaving a will that directed the application of half his interest in his decreased brother's Georgia estate to the education of the negro slaves thereon or of their offspring as soon as the laws of of their offspring as soon as the laws of Georgia should permit the education of

the slave population.

Four prominent Savanna merchants were named as the trustees under the will, but declined the trust on the ground that the laws of Georgia prohib ited the education of slaves and the bequest was therefore void. The sum involved was a little over 1335. The heirs, in view of the logal condition of the legacy in Georgia, attempted to secure the money, but the courts decided against them. Accordingly the money has been in charge of the Bank of England, and William Lloyd Garrison was notified of the facts to the end that when circumstances might arise under which the money could be applied as cording to the terms to the will, steps could be taken for securing possession

of it.

After the emancipation of all slaves in this country a son of Mr. Garriem, who had found among his father's papers a memorandum on the matter, called the attention of the Georgia authorities to the legacy. While the Bank of England is anxious to pay over the money to whoever may be legally entitled to receive it, a letter to that effect having just been received by the entitled to receive it, a letter to that effect having just been received by the school commissioners of Georgia, the difficulty is that the negroes of the Gowrie plantation have been scattered by the war, and there is no way of finding their heirs. Now the question is whether the bequest, which has been bearing interest since 1836, can be secured and devoted to the general education of the negroes. tion of the negroes.

The mayor presided at the meeting. Mr. Powderly's address was largely devoted to an expection of the principles underlying the organization of the Knights of Labor, hostility to land monopoly, the tariff reform, government ownership of railroads, the prevention of child tabor, equal pay for both sexes, and arbitration between employer and employe. In speaking of the strike on the Central he said that it would not cease to make itself felt until it had been writ.

Evil Island Anticosti.

The island of Anticosti has always held an evil reputation to mariners lying close to the course of navigation to the mouth of the St. Lawrence. Its long, low shores were the scene of many disastrons wrecks, and the sufferings of sailors who succeeded in gaining the land were grievous and terrible from the absence of water and means of subsistence. Since it has been properly lighted its dangers have been greatly diminished; but from the fact of its desolate and lonely position and its absence of population the island has long been the resort of characters who have found there a refuge

It is evident that of late years this criminal population must have been largely increased, for we now hear that the wreck of the Idaho has been taken possession of by a gang of pirates, upward of 100 strong, who have set at defiance the Canadian cruiser Wakeham. and that it had been necessary to send her majesty's steamship Comus from Halifax to cope with them. It may be hoped that her operations will result in the complete breaking up of this gang of despetudoes, who constitute a serious danger to the crews of versels that may be cast upon the coast. - London Stand-

WHAT IS

SCROFULA

It is that impurity in the blood, which, accumulating in the glands of the neck, produces unsightly lumps or swellings; which causes painful running sores on the arms, legs, of feet; which developes pleers in the eyes, ears, or nose, often causing blindness or deafness; which is the origin of pimples, cancerous growths, or the many other manifestations usually ascribed to "humors:" which. fastening upon the lungs, causes consumption and death. Being the most ancient, it is the most general of all diseases or affections, for very few persons are entirely free from it.

How Can CURED

Union's adherence to McCloud, the exostmaster of Marysville, under the in-Stable. luence of A. J. Hare of that place and brother of the nominee, helped considerably to do the business, and joined in a conspiracy to defeat Young, it worked most successfully. As an Hiberman gentleman from Hancock expressed it. "Union held the kay to the situation," as transpires in the result. But to details. The preliminaries of the convention were given in Tuesday's

stan, and while there may be an interst to know just how it was done, there snothing consoling to Marion county itizens in the proceedings after the first ballot, when Young's chances began to change in aspect, after Norton's framatic presentation of Hare, together with his beautiful posings and general onspiculty for the Wyandot. It may e added parenthetically that the opposition and apparent had feeling to ward the nominee in Marion county only arises from the manner in which no received the nomination. While others announced their candidacy and vere making thorough canvasses of

the district, Hare was protesting against the use of his name. ${f \hat{M}}$ r, Hare's qualifications are not questioned, in fact he is admitted to possess abilities equal to any of the candidates before the convention.
